

INTRODUCING

S³ Technology™

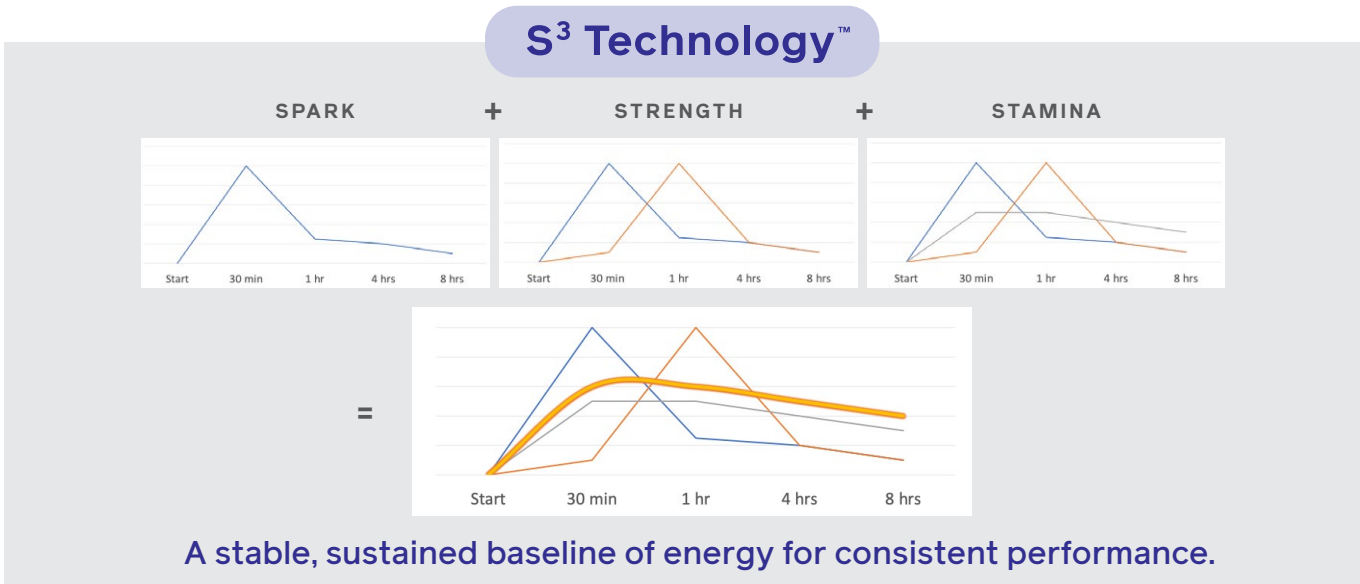

Our new proprietary energy blend.

How does it work?

The Truvy Boost™ you know and love is now supercharged with S³ Technology to aid in stable, all day energy. Dr. Tory Parker crafted our proprietary energy blend, S³ Technology, to help keep you alert, energized, and performing at a consistent level all day long.*

We hope you didn't think we were done; Truvy Boost™ drinks contain all the great benefits of TruFix plus the new, stable, and long-lasting stimulation of S³ Technology to form a top-performing weight management system.*

So how do we do it? **Spark** is your typical quick-release caffeine. You feel it right away but tends to wear off after a few hours. **Strength** is that second wave. We discovered a new technology of coated caffeine that delays its release into your blood stream and kicks in just when the spark starts to wear off. **Stamina** is another new technology that releases little bits of caffeine into your blood stream very slowly throughout the day. **S³ Technology** is the optimal ratio of all three blended into one single, delicious drink. Giving you a sustained and balanced energy level that is safe and effective for up to 8 hours.
